INDEX TO SUBJECTS

A

Acid phosphate activity associated with phagotrophy, in ciliate Tetrahymena, 243
—, localization of in hepatic lysosomes, by EM, 773
Adrenocortex, rat, ultrastructural zonation of, 105
Algae, blue-green, EM studies, 63
—, thermophilic and acidophilic, fine structure of, 910
Ameloblasts, during matrix formation and maturation of enamel, ultrastructure of, 825
Amoeba proteus, infective organisms in cytoplasm of, 317

Animals and Plants

Bug, 486
Chick, 463
Cockroach, 720
Crayfish, 222
Ctenophore, 383
Flatworm, 211
Frog, 1, 493
Fruit fly, 567
Goldfish, 853
Grasshopper, 29
Guinea pig, 639
Lily, 271, 279
Man, 81
Mollusc, 395, 490
Monkey, 238
Moth, 747
Mouse, 157, 263, 353, 369, 479
Opossum 653
Rat 19, 47, 105, 229, 236, 299, 401, 415, 583
Rotifer 799
Salamander 619
Sea urchin 93
Vicia faba 445
Antibody molecules, conjugation of with ferritin, properties of specific stains for EM, 519
Antigens in eggs and developmental stages of sea urchin, immunological and physicochemical properties, 93

B

Bacillus, Fowler's, and its parasporal body, 285
— *subtilis*, some features of remarkable organelle of, 183
Bacteria, localization of tritium label in, use of radioautography and EM, 219
—, spherical fine structure of nuclei of, 171
Blood, EM replicas from surface of fracture through frozen human red cells, 841
—, proteins, entry and localization of, in moth oocytes, 747
—, structure of nucleated erythrocytes, EM study, 671
Bone, rat, EM study of osteoclasts in healing fractures of, 299
—, young rat, fine structure of osteoblasts in metaphysis of tibia, 573

C

Cardiac muscle, mammalian, ultrastructure of, 325
Cartilage, permeability of, to inorganic S^{35} sulfate, 401
Cell, satellite, of skeletal muscle fibers, 493
—, suspensions, new embedding method for, 217
— wall, mycobacterial, "paired fibrous structure" of, 496
—, yeast, fine structure of, 689
Cells, interstitial testicular, opossum, fine structure of, 653
—, liver, of mice treated with saccharated iron oxide, intranuclear aggregates of ferritin in, 263
—, mammalian, cultured, effect of pH on growth, protein synthesis, and lipid-rich particles of, 141
—, mammalian, penetration of by DNA, 81
—, mammary epithelial, of C3H/Crgl mouse, milk protein droplet formation in Golgi apparatus of, 479
—, microchemical determination of DNA in, 619
—, normal and malignant, relationship between water permeability and sulfhydryl groups in, 733
—, oxyntic, in gastric glands of frogs, studied in EM, 1
—, Strain L, source of lipid accumulation in, 135
Cellular membrane structures, silver impregnation of, ultrathin sections for EM, 121
Cilia, of ctenophore swimming-plates, fine structure of, 383
—, of rotifers, fine structure of, 799
Coccidioides immitis, cultured spherules of, EM study, 627
Cochiolin cases, of prisms, in *Mytilus edulis*, 395

Collagen formation, morphological and chemical studies of, 639
— solutions, formation of fibrils from, effect of mucopolysaccharides and nucleic acids, EM study, 193
Cuticular border, of luminal cells of coiled duct of eccrine sweat glands, in *Macaca mulatta*, EM study, 238
Cytoplasm, of *Amoeba proteus*, infective organisms in, 317
Cytoplasmic inclusion bodies in cortisol-treated mammary tumors of C3H/Crgl mice, 915

D

Deoxycytidine and 5-methyldeoxycytidine, deamination of, in developing anthers of *Lilium longiflorum*, 279
DNA and proteins, localization of macromolecules in *E. coli*, 539
— content and alternative meiotic patterns in discocephalinid bugs, relationship between, 486
—, microchemical determination of, in individual cells, 619
—, penetration of mammalian cells by, 81
—, RNA, and mucopolysaccharides, effects of on function of fibrils from collagen solutions, EM study, 193
—, RNA, and protein metabolism during mitotic cycle in *Vicia faba*, 445
— synthesis, in mitotic cycle *in vitro*, timing of, 509
DNase activity, in relation to mitotic cycle, periodic induction of, 271

E

E. coli, localization of macromolecules in, 539, 555
Eccrine sweat glands, in *Macaca mulatta*, EM study of cuticular border of luminal cells of coiled duct of, 238
Eggs, and developmental stages, sea urchin, antigens in, immunological and physicochemical properties, 93
Electron microscopy, instrument for trimming plastic specimen blocks prior to sectioning for, 726
— microscopy, simple and rapid method for mounting serial sections for, 724
Embedded tissue, method of removing epoxy resin from, 409
Embedding epoxy resins, improvements in methods, 409
—, new method for cell suspensions, 217
— techniques, fixation, dehydration, in preservation of myelin sheath ultrastructure, 429
Enamel, maturation, ultrastructure of ameloblasts during matrix formation, 825
Enzymes, oxidative and hydrolytic, in nephron of *Necturus maculosus*, 893
—, oxidative, mitochondrial localization of, staining with tetrazolium salts, 47
—, respiratory, of mitochondria, content and organization of, 19
Epithelial cells, mammary, of C3H/Crgl mouse, milk protein droplet formation in Golgi apparatus of, 479
Erythrocytes, nucleated, structure of, studied in EM, 671
Eye, cockroach, photoreceptor structures of retinal cells of, 720

F

Fatbody, of *Drosophila*, intracellular localization of kynurenine in, 567
Ferritin, conjugation of, with antibody molecules, properties of specific stains for EM, 519
—, ultranuclear aggregates of, in liver cells of mice treated with saccharated iron oxide, 263
Fibrils, formation of from collagen solutions, effect of mucopolysaccharides and nucleic acids, EM study, 193
Fixation, dehydration, embedding techniques, in preservation of myelin sheath ultrastructure, 429
—, formalin, in cytochemical demonstration of succinic dehydrogenase in mitochondria, 415
—, sodium permanganate, for EM, 711
Freeze-substitution, application of to EM studies on invertebrate oocytes, 785

G

Ganglion, eighth nerve, of goldfish, fine structure of nerve cell bodies and their myelin sheaths in, 853
Gastric glands, oxyntic cells in, of frogs, studied in EM, 1
Golgi bodies, in living osteoblasts, 463
— bodies, of mammary epithelial cells in C3H/Crgl mouse, milk protein droplet formation in, 479
Glyceraldehyde-3-phosphate dehydrogenase, histochemical demonstration of activity of, 573
Granulomata, guinea pig, fine structure of, 639

H

Histochemical demonstration of glyceraldehyde-3-phosphate dehydrogenase activity, 573
Hyphae, centrifuged, of *Neurospora*, EM study of, 609

I

Inclusion bodies, cytoplasmic, in cortisol-treated mammary tumors of C3H/Crgl mice, 915
Induction of DNase activity, periodic, in relation to mitotic cycle, 271
Infective organisms, in cytoplasm of *Amoeba proteus*, 317

K

Kidney, mouse, lipoprotein granules in cortical collecting tubules of, 157

Kynurenine, ultracellular localization of, in fatbody of *Drosophila*, 567

L

Lipid accumulation, in strain L cells, source of, 135
Lipid-rich particles, in cultured mammalian cells, effect of pH on growth, protein synthesis and, 141
Lipomyces lipofer, mitosis in yeast, 879
Lipoprotein granules, in cortical collecting tubules of mouse kidney, 157
Liver cells, intranuclear aggregates of ferritin in, of mice treated with saccharated iron oxide, 263
Lysosomes, hepatic, localization of acid phosphatase activity in, EM study, 773

M

Meiotic patterns, alternative, in discocephalinid bugs, relationship to DNA content, 486
Membranes, nerve fiber, infoldings of, in mollusc *Aplysia californica*, 490
Mitochondria and derived particles from baker's yeast, morphology and oxidative phosphorylation capacity of, 701
—, content and organization of respiratory enzymes of, 19
—, deposition of silica in, EM study, 236
—, formalin fixation of, in cytochemical demonstration of succinic dehydrogenase of, 415
Mitochondrial localization of oxidative enzymes, staining with tetrazolium salts, 47
Mitosis in yeast, *Lipomyces lipofer*, 879
Mitotic cycle, in *Vicia faba*, nucleic acid and protein metabolism during, 445
— cycle, *in vitro*, timing of DNA synthesis in, 509
— cycle, periodic induction of DNase activity in relation to, 271
Mucopolysaccharides and nucleic acids, effect of on formation of fibrils from collagen solutions, EM study, 193
Muscle, cardiac, mammalian, ultrastructure of, 325
— fibers, skeletal, satellite cell of, 493
—, site of swelling in, 502
Mycobacteria, intracytoplasmic organelles of, fine structure of, 597
Mycobacterial cell wall, "paired fibrous structure" of, 496
Myelin sheaths, of nerve cell bodies, in eighth nerve ganglion of goldfish, fine structure of, 853
— sheaths, preservation of ultrastructure of, evaluation of fixation, dehydration, and embedding techniques, 429

N

Nephron, of *Necturus maculosus*, oxidative and hydrolytic enzymes in, 893
Nerve cell bodies and their myelin sheaths, in eighth nerve ganglion of goldfish, fine structure of, 853
Nerve endings and synaptic vesicles, isolation of in mitochondrial and microsomal fractions, 229
— fiber membranes, infoldings of, in mollusc *Aplysia californica*, 490
Neurospora, centrifuged hyphae of, EM study of, 609
Nuclei of spherical bacteria, fine structure of, 171
—, pancreatic acinar, fixed in potassium permanganate, ultraviolet microscopy of, 716

O

Oocytes, invertebrate, application of freeze-substitution to EM studies on, 785
—, of saturniid moths, entry and localization of blood proteins in, 747
Organelle, in *Bacillus subtilis*, some features of, 183
— induction and differentiation in grasshopper spermatogenesis, influence of x-rays on, 29
—, intracytoplasmic, of mycobacteria, fine structure of, 597
Osteoblasts, in metaphysis of tibia of young rats, fine structure of, 583
—, living, Golgi complex in, 463
Osteoclasts, in healing fractures of rat bone, EM study of, 299
Oxyntic cells, in gastric glands of frogs, studied in EM, 1

P

Pancreatic acinar nuclei, fixed in potassium permanganate, ultraviolet microscopy of, 716
Parasporal body, in Fowler's bacillus, 285
Phagotrophy, in ciliate *Tetrahymena*, acid phosphatase activity associated with, 243
Photoreceptor structures, of retinal cells of cockroach eye, 720
Plasma-cell tumors, MPC-1 and X5563, of mouse, EM study of, 353
— tumors, tissue cultures of X5563, EM study of, 369
Prisms, cochiolin cases of, in *Mytilus edulis*, 395
Protein and DNA, localization of macromolecules, in *E. coli*, 539
— and nucleic acid metabolism during mitotic cycle in *Vicia faba*, 445
—, blood, entry and localization of, in moth oocytes, 747
— droplet formation (milk), in Golgi apparatus of mammary epithelial cells, of C3H/Crgl mouse, 479
— synthesis, in cultured mammalian cells, effect of pH on growth, lipid-rich particles and, 141

R

Radioactive labels, adenine-8-C^{14}, uridine-H^3, thymidine-H^3, phenylalanine-3-C^{14}, in nucleic acid and protein metabolism during mitotic cycle in *Vicia faba*, 445
— labels, inorganic S^{35}-sulfate, permeability of cartilage, 401

Radioactive labels, leucine-H^3 and thymidine-H^3, localization of macromolecules (DNA and proteins), in *E. coli*, 539
— labels, sodium acetate 1-C^{14}, cholesterol 4-C^{14} stearate, palmitic and 1-C^{14}, role of exogenous source in lipid accumulation in strain L cells, 135
— labels, tritiated DNA, penetration of mammalian cells, 81
— labels, tritiated thymidine, in cellular complement of skeletal system during growth and aging, 813
— labels, tritiated thymidine, localization of in bacteria, 219
— labels, tritiated thymidine, timing of DNA synthesis in mitotic cycle *in vitro*, 509
— labels, uridine-H^3 and cytidine-H^3, localization of macromolecules (RNA) in *E coli*, 555
Replicas, EM, from surface of fracture through frozen human red cells, 841
Resin, epoxy, embedding methods, improvements in, 409
—, epoxy, method of removing from embedded tissue, 909
RNA, DNA, and mucopolysaccharides, effect on formation of fibrils from collagen solutions, EM study, 193
—, from different sources, comparative EM study, 253
—, site of synthesis, localization of macromolecules in *E. coli*, 555

S

Saccharomyces cerevisiae, oxidative metabolism of, 689, 701
Satellite cell, of skeletal muscle fibers, 493
Serial sections, for EM, simple and rapid method for mounting of, 724
Shell formation, of oyster, EM study of crystal layer in, 761
Silica, deposition of, in mitochondria, EM study, 236
Silver impregnation, of ultrathin sections for EM, 121
Skeletal system, cellular complement during growth and aging, autoradiography with tritiated thymidine, 813
Specimen blocks, plastic, instrument for trimming prior to sectioning for EM, 726
Spermatogenesis, grasshopper, influence of x-rays on organelle induction and differentiation in, 29
Spermatozoon tail, of flatworm *Haematolœchus*, fine structure of, 211
Spermiogenesis, in crayfish *Procambarus clarkii*, structural characterization of mature sperm, 222
Spherules, cultured, of *Coccidioides immitis*, EM study of, 627
Staining results with tetrazolium salts, mitochondrial localization of oxidative enzymes, 47
Stains, properties of for EM, prepared by conjugation of antibody molecules with ferritin, 519
Succinic dehydrogenase, of mitochondria, formalin fixation in cytochemical demonstration of, 415
Sulfhydryl groups, relationship to water permeability, in malignant and normal cells, 733
Swelling, in muscle, site of, 502
Swimming-plates, of ctenophore, fine structure of cilia of, 383
Synaptic vesicles and nerve endings, isolation of in mitochondrial and microsomal fractions, 229

T

Testicular interstitial cells, opossum, fine structure of, 653
Tetrahymena, ciliate, acid phosphatase activity associated with phagotrophy in, 243
Tumors, mammary, cortisol-treated, of C3H/Crgl mice, cytoplasmic inclusions in, 915
—, plasma-cell, in PC-1 and X5563, of mouse, EM study of, 353
—, plasma-cell, tissue cultures of X5563, of mouse, EM study of, 369

U

Ultrathin sections for EM, silver impregnation of, 121
Ultraviolet microscopy, of pancreatic acinar nuclei fixed in potassium permanganate, 716

W

Water permeability, and integrity of sulfhydryl groups, in malignant and normal cells, 733
